This is our 4th year to host the business services expo focusing on Senior Citizens health and wellness. You will be able to put your business information in the hands of between 300-400 senior citizens and/or their caregivers. We have been able to connect many businesses to each other as resources and partners. Senior citizens in our community need to be able to quickly find the services and care they need as they are aging. Lee County is home to a slightly older population. According to the Census, 29% of Lee County's population are residents between 45 and 64 years of age (versus 27% for the U.S.) and 17% of county residents are 65 years or older (versus 13% for the U.S.).
